Re: **0970450, HAWTHORN WOODS - Public Notice Requirement**

Dear Martin A. Galantha:

According to our records, public notification must be issued for the following event or situation that occurred during the July 1, 2002 through July 31, 2002 reporting period:

The total coliform maximum contaminant level (MCL) was exceeded during the reporting period (more than one sample tested positive).

The event referenced above are categorized as a Tier 2 type public notice (PN) situation. PN must be mailed or hand delivered within 30 days of this notification. In addition, public water supplies must also use another method reasonably calculated to reach others if they would not be reached by the first method. Such methods could include newspapers, e-mail, or delivery to community organizations. If you mail, post, or hand deliver, print your notice on letterhead, if available.

Within **10 days** of completing the public notification requirements for the initial public notice and any repeat notices, the attached Illinois EPA Certification Form must be completed, signed and returned to the Illinois EPA, Bureau of Water, CAS #19, P.O. Box 19276, Springfield, Illinois 62794-9276. Include with the certification form a representative copy of each type of notice distributed, published, posted, and made available to the persons served by the water supply and to the media (e.g. newspaper article, press release to TV/radio, mail notices).

Failure to issue public notification will result in a violation of the Public Notice Rule. If you have any questions or need assistance preparing your notice, please call me at 217-785-0561.

Sincerely,

Allison Ristau
